OUR JUNIOR ENTERPRISE HIGHLIGHTS THE MAIN EVENTS OF THE YEAR

SUMMARY

Partnership signed with Saint Gobain

Participation during the CSR matinee

Active JE: a study for the Maison De La Chimie

A collaboration proposal with researchers of our school

What's next?...

Partnership signed with Saint Gobain

The Chimie Perspectives team is happy to announce you the signature of a human partnership with Saint Gobain, housing worldwide leader.

This partnership consists of an exchange of services concerning formation and communication by both sides. The objectives of this partnership are: forming the Chimie Perspectives' members to improve their humans resources skills and to give the opportunity for students of Chimie ParisTech - PSL to discover Saint Gobain's activities and values.

This collaboration is a guarantee of our hardworking and the quality of our services.

The formations Chimie Perspectives will give for its future members will valorize the corporate culture.

Furthermore, Saint Gobain will benefit of a better visibility within Chimie ParisTech - PSL. The Saint Gobain and Chimie Perspectives teams will propose various group work for all students of Chimie ParisTech.

These group work will guide students in their professionalization.

Participation during the CSR matinee

Chimie Perspectives has organized, with the collaboration of the school course "Enterprise Knowledge - Management Economics and Social sciences", round-table discussions

about "becoming a responsible engineer".

The matinee began with a presentation of the Corporate Social Responsibility (CSR) by Julien and Léo, the former President and Vice-President of the JE. Then, the first-year students were divided into six groups in which they could exchange views and debate with professionals from start-ups of multinational enterprises.

Active JE: a study for the MDLC

For several years, the Maison de la Chimie has been entrusting us with the transcription of its colloquiums. In March, after a recruitment lead by our pole of Human Resources, 12 students of Chimie Paristech were chosen to transcribe the conventions of February 26th 2020. The theme, this year, was "Chemistry and Light". This transcription of 13 conventions will then become part of a scientific publication about this colloquium. Thanks to the serious work of our students and the conscientious review of the Quality pole, we were able to provide deliverables in line with the criteria and expectations of the Maison de la Chimie. We thank them for the trust they put in us every year and wish we will work with them again in the future.

Fondation de la Maison de la Chimie

Collaborating with researchers?

Chimie Perspectives offers its help in bibliographic research to the researchers of the school to help them fully dedicating themselves to their experiments and their laboratories.

What's next?...

The Junior Enterprise of the ENSCP remains entirely at your disposal and service for all your projects. To face the current crisis, we are available and reactive to help you through missions and studies. Of course, we are still able to undertake our usual missions, assuming that they are achievable outside of the school.

Feel free to turn to us!
