

NOTICE BIOGRAPHIQUE

GIRARD, Christian

Senior Associate-Professor

Chimie ParisTech

*Organic chemistry: synthesis, new methodologies, biological activity
– Supported reagents and catalysts – Continuous-flow synthesis in
meso and microreactors, microwaves*

Current fields of expertise

- Triazole containing molecules, in-flow, A-21•CuI catalyst (CuAAC)

Click chemistry – Chemistry Nobel 2022 – Click-on image! –>

- Polycyclic molecules, [5+2] / [4+2] thermal, in-flow, μ -waves

- Biological activities: cancer, rare diseases, ...

- Expert Chemist (*Europe, France, proposals, journals, ...*)

- Scientific vulgarization and communication (*tv, newspapers, ...*)
