

**Anna is a research engineer in a laboratory dedicated to analytical chemistry that carries out forensic analysis on behalf of the judicial system. She is a professional in « continuing education » enrolled in the ICI program, promo 2024.**

**Why did you decide to go back to university?**

We observe a constant evolution in requests in order to provide increasingly specific answers. After 4 years' experience in my department, the opportunity offered by my employer to take further training as part of my professional activity is a real asset.

**How will this Master program add value to your career?**

The ICI Master's degree enabled me to discover advanced domains and innovative tools in the field of chemistry, which I had not seen in my initial academic training. Thanks to this latest knowledge, I will be able to put new skills to good use in my daily work, but also for R&D projects in which I would like to get involved, to bring a fresh vision to my team's activities.

**Your experience in 3 words?**

High-level, support, diversity

The Master ICI is a demanding, high-level academic program, where I found a real commitment from the various teachers: my situation was taken into account, and I was accompanied regarding my knowledge and professional objectives.

Finally, I really enjoyed studying for a few months alongside the other students of different nationalities, ages, educational backgrounds and professional goals. It was a very enriching experience!
