

Irene is an international student from UNIFI (University of Florence), joined the ICI master program in M2, double degree (Promo 2024)

1) Why did you choose the double degree ?

I chose to pursue the double degree to benefit from the complementary strengths of both institutions.

This kind of experience inevitably leads to the acquisition of new skills, connections and knowledge, valuable not only for my field of study but also for my strengths and interests for the future.

2) The most striking thing about courses?

If I have to choose one of the most interesting aspects of the courses offered by the ICI master's program, I would say that I was impressed by the amount of time and effort invested by many professors to provide us with all the tools to understand a certain subject, trusting our ability to conduct innovative projects and present our results.

3) Any advice for future students?

My advice to future students is to take full advantage of the opportunities offered by the University. They can be valuable resources for your future career and may only come once in a lifetime.
